Kota Cilegon, Banten

Informatics graduate from Telkom University with strong analytical and problem-solving skills. Experienced in data management and processing. A fast learner, adaptable, and detail-oriented individual who is motivated to grow.

Education

Telkom University  - Bandung, Indonesia
Bachelor of Computer Science, 3.34/4.00

Sep 2021 - Aug 2025

Work Experiences

PT. Bank Tabungan Negara (Persero) Tbk (BTN) - Jakarta, Indonesia
Data Management Support

Jun 2026 - Present

- Manage, process, and maintain operational data using Microsoft Excel to support daily business activities and reporting requirements.
- Perform data entry, data validation, and data cleaning to ensure data accuracy, consistency, and completeness.
- Organize and consolidate data from multiple sources into structured datasets for reporting and analysis purposes.
- Create and maintain Excel-based reports, recaps, and data monitoring tools to support decision-making and operational processes.

PT. Jago Talenta Indonesia - Bandung, Indonesia
UI/UX Designer Internship

Jun 2024 - Sep 2024

- Redesigned the main website for PT. Jago Talenta Indonesia, leading to a projected 25% improvement in user engagement and a 15% reduction in bounce rate.
- Developed over 30 wireframes and high-fidelity prototypes, and conducted usability testing with 10 users to refine the design, resulting in a 40% improvement in task efficiency.
- Designed a new website application for CV. Harapan Baru, which increased user satisfaction scores by 30% based on post-launch surveys.
- Led user research initiatives, analyzing 5+ in-depth interviews and 20+ survey responses to identify key user pain points and inform data-driven design decisions.

Organizational Experience

Festival Budaya 2024 - Bandung, Indonesia
Division Head, Dakom Division (Consumption Budgeting)

Sep 2024 - Dec 2024

- Successfully managed a consumption budget of IDR 30M+ for over 350 committee members and participants.
- Coordinated with 5+ vendors to ensure on-time delivery and adherence to quality standards.

Projects

- OVIA - Digital Banking Mobile Application**  (2026): Designed a modern digital banking mobile application focused on premium fintech experiences and intuitive financial interactions. Developed end-to-end mobile UI/UX flows including home dashboard, card management, transaction activity, QRIS payments, financial insights, and profile management. Created a clean financial hierarchy, dedicated card security controls, and streamlined navigation to support fast and seamless banking experiences. Applied modern fintech design principles with scalable components, soft visual aesthetics, and mobile-first interaction patterns to deliver a production-ready digital banking concept.
- Stockwise -Warehouse & Stock Opname System (Multi-Warehouse)**  (2026): Designed an enterprise-level UI/UX for a multi-warehouse stock opname system handling 5,000+ inventory items. Developed mobile and desktop interfaces covering end-to-end workflows, including stock input (scan & manual), real-time validation, mismatch analysis, and approval processes. Optimized large data handling using lazy loading and infinite scroll, and designed a barcode scanning interface to improve efficiency and reduce input errors in warehouse operations.
- Bazarsip – Premium E-Commerce Web Application**  (2026): Designed an end-to-end luxury e-commerce platform comprising a highly efficient, Admin Dashboard and a responsive web application. To ensure visual consistency, I established a comprehensive, WCAG-compliant Design System that standardized typography, color palettes, and UI components across the entire platform. I created high-fidelity wireframes and interactive prototypes with a strong focus on a clean, modern aesthetic, highly readable data tables, and intuitive navigation. Additionally, I improved the overall checkout experience by simplifying the payment and shipping flow through clear visual hierarchies, intuitive micro-interactions, and actionable empty states.
- Design for Self-Regulated Learning (SRL) Dashboard Project**  (2025): Designed and developed a comprehensive UI/UX for a learning dashboard aimed at supporting distance learners through Self- Regulated Learning (SRL) principles. The project applied a User- Centered Design (UCD) methodology to enhance student motivation, resulting in a high-fidelity prototype that was evaluated through usability testing with 5 participants. The final design achieved an average System Usability Scale (SUS) score of 82/100, indicating an "Excellent" level of user acceptance.
- SQL Injection Detection Using Transformer Models Project**  (2025): Developed a Transformer-based model to detect SQL injection attacks by analyzing HTTP request patterns. The model successfully achieved 98.5% accuracy.
- Bladerunner Web Marketing Project**  (2025): Created key pages including the landing page, services overview, portfolio, and contact form,

contributing to a 20% increase in lead generation and a 10% reduction in bounce rate. The project focused on optimizing the user journey through clear navigation and applying modern UI/UX principles.

- **Data Visualization Project**  (2025): Built an interactive data visualization dashboard using Streamlit, designing intuitive user interfaces and implementing charts, graphs, and filters to support data- driven decision- making, while ensuring responsive performance for an accessible and user- friendly experience.
- **Design Logo PT. Digital Multi Distribusi**  (2024): Created a professional and visually appealing logo design for PT. Digital Multi Distribusi that was adopted across all branding materials, receiving a 90% approval rating from internal stakeholders.
- **Design Multiku**  (2024): Developed UI/UX designs and copywriting for the Multiku application, delivering a complete redesign that led to a 30% improvement in user task completion rates and a 25% increase in positive app store reviews.
- **NusaWashLaundry App Project**  (2024): Developed a laundry application using Dart, implementing CRUD features to streamline the service process for users.
- **Re-design UI Igracias Website Project**  (2023): Redesigned the Igracias university portal using Figma, improving user navigation and information architecture, which resulted in a 40% decrease in user-reported issues and a 35% increase in session duration.

Certifications & Courses

- **Udemy**  (2025): Data Science Untuk Pemula dengan Python
- **Udemy**  (2025): Fullstack Programming Untuk Pemula
- **Microsoft**  (2025): Preparation Course for Azure AI Fundamentals (AI-900)
- **Udemy**  (2025): Internet Of Things Untuk Pemula
- **Udemy**  (2025): Cyber Security Untuk Pemula
- **Revou**  (2025): Intro to Software Engineering
- **Revou**  (2025): Intro to Data Analytics
- **Dicoding**  (2025): Belajar Dasar AI
- **English Proficiency Test Telkom University**  (2025): 527

Skills

Tools: Figma, Streamlit, Tableau, Visual Studio Code, Microsoft Office Suite, Canva, moodle.

Languages & Frameworks: Python (Pandas, NumPy, SciPy, Scikit-Learn, XGBoost, TensorFlow, PyTorch, Keras, Matplotlib, Seaborn), JavaScript, HTML5, CSS, Java, MySQL.

Interpersonal Skills: Quick Learner, Analytical Thinking, Problem Solving, Communication, Team Collaboration, Active Listening, Responsibility.
